

Service Overview and Price List

Valid as of 30th April 2024

Revisions

Revisions consist of a professional basic overhaul with the following services:

- The movement is completely dismantled, cleaned, assembled, adjusted, oiled, and regulated
- Replacement of wear parts
- Cleaning of the case as well as the metal strap and the buckle
- Restoration of water resistance. Should the restoration of water resistance no longer be possible due to the age of the watch or the technical requirements, this will be communicated accordingly.
- Provision of the certificate of accuracy
- Final inspection
- 12 months warranty

Prices and Estimates

The revision prices for common and current models can be found in the attached price list.

If the status of the watch indicates a greater effort, we prepare an individual cost estimate, this generally applies for vintage watches.

In the event of a rejected cost estimate, CHF 50 will be charged for the already incurred expenses.

The prices shown below are inclusive of VAT. Please contact us regarding prices for entire movements, complete cases or other components.

Exchange

Instead of a revision of your Chronoswiss a model from the current collection in exchange? -Please contact us.

Shipments

A flat-rate will be charged for shipping according to the enclosed price list to cover for postage, packaging and insurance.

If you have your Chronoswiss sent to us via a jeweller, he or she will charge a handling, consultation and shipping fee of CHF/€/US\$ 100.-. The entire processing is thus taken over by your trusted jeweller and your Chronoswiss is also insured for transport.
